

Recovery of equipments and machinery

We adapt, rebuild and update used machinery to put it into production, getting the same quality and performance equivalent to new machinery.

Vacuum pumps

Machine frames

Gearboxes

Suction presses

Fan-pump

Benefits of using rebuilt machinery:

- Short delivery time.
- Same guarantees and performance as if it were new machinery.
- Reduction of initial capital investment.
- Fast Pay-Back.
- High rate of Internal Profitability.

Machine rolls

Screens

The machinery to rebuild is submitted to a detailed and rigorous process by COPASA®, checking every component and replacing any element that is out of our trust, by a completely new one. We always offer warranty to our Customer on the rebuilt product and the subsequent monitoring, maintenance and spare parts with technical documentation.
